Allergen Statement

3 January 2022

To Whom It May Concern,

All Mike's Hot Honey, Inc. products are produced at SQF Certified facilities with robust food safety programs that meet all requirements for safe handling and storage of allergens.

Whenever possible, we elect to partner with co-manufacturers who do not handle allergens in their operations. For all other manufacturing sites, the Quality Assurance Departments for these co-packers maintain current allergen statements on file for all companies that supply ingredients as required by the SQF program. In addition, all appropriate steps are taken to study storage, batching, production, and packaging operations to eliminate any potential for cross contamination of raw materials and finished products from allergens.

For any further information or concerns, please contact me directly.

Best Regards,

Wesley McEllen
